Results-driven Java Backend Developer with 6 years of experience in designing, developing, and maintaining scalable enterprise applications using Java, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices, Apache Kafka, and SQL databases. Experienced in developing event-driven architectures, building secure backend services using Spring Security, JWT and OAuth2, and optimizing application performance. Strong hands-on experience with CI/CD, Jenkins, Git, Maven, Splunk, Dynatrace and Agile development methodologies. Passionate about building highly available, scalable, and secure backend systems.

## SKILLS:

- **DevOps Tools:** Aws DevOps, GitLab, GitHub, Bit bucket, Maven, Gradle, CI/CD, Jenkins, Jira, Sonar Qube, Junit, Mockito, Log4j, JMeter, Chef, Swagger, Terraform, JFrog, GenAI, ChatGPT, Copilot
- **Databases:** Oracle Exadata, SQL Server, MySQL, PostgreSQL, Mongo DB, Redis Cache, Cassandra
- **Framework:** Spring Web MVC, Spring REST, Spring Security, Spring Cloud, Spring Data JPA, Spring Boot Framework
- **Monitoring & Logging:** ELK Stack (Elasticsearch, Logstash, Kibana), Prometheus, Grafana, Splunk, Nagios, Datadog
- **App/Web servers:** Apache HTTP Server, Nginx, Apache Tomcat, JBoss, IBM WebSphere, Ubuntu, Linux, Unix
- **Programming Languages:** Java8+

## WORK EXPERIENCE:

### Senior Software Engineer

June 2025 – July 2026

**Company:** IMR SOFT LLC, Princeton, NJ

**Client:** Mastercard, United States, Missouri, Ofallon, Hybrid

**Project:** Mastercard- Real-Time Payment Processing Platform

**Description of the project:** Mastercard Digital Enablement Service (MDES) is Mastercard's tokenization platform that enables secure digital payments through mobile wallets such as Apple Pay. The platform replaces sensitive card information with secure payment tokens, allowing customers to perform contactless and in-app transactions while protecting cardholder data.

- Developed secure applications using **Spring Security, JWT, OAuth2, and SSL/TLS**, ensuring secure authentication and authorization.
- Created automated unit and integration tests using **JUnit 5, Mockito, and Spring Boot Test**, achieving over **85%** code coverage.
- Integrated **Apache Kafka** for asynchronous event processing, improving system scalability and enabling real-time data streaming.
- Built high-performance applications using **Spring Boot, Spring MVC, Spring Data JPA, and Hibernate**, reducing database response times through query optimization.
- Collaborated with cross-functional Agile teams using **JIRA, Git, Maven, Jenkins, and SonarQube** to deliver high-quality software.
- Monitored application health using **Splunk, Prometheus, Grafana, and ELK Stack**, enabling proactive issue detection and faster incident resolution.
- Enhanced Logging & Performance Analytics: Integrated ELK Stack (Elasticsearch, Logstash, Kibana) and Splunk to improve system observability, enabling real-time performance insights and proactive issue resolution.

**Technologies/ Tools Used:** Java 17, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security, OAuth2, JWT, RESTful APIs, Apache Kafka, Oracle, SQL, Maven, Git, Jenkins, JUnit 5, Mockito, Splunk, Prometheus, Grafana, Swagger, SonarQube

### Software Engineer

Oct 2024 – May 2025

**Company:** IMR SOFT LLC, Princeton, NJ

**Client:** Fifth Third Bank, Remote

**Description of the project:** Global Digital Transaction is a Real-Time Payments Platform (Zelle) enables customers to send and receive money instantly between participating U.S. banks using a mobile number or email address. As part of the Fifth Third Bank Zelle integration team, I worked on developing and maintaining backend microservices responsible for payment initiation, customer validation, transaction processing, account verification, fraud rule execution, payment status tracking, and integration with the Zelle payment network.

- **Automated Application Deployment:** Developed CI/CD pipelines using Jenkins, GitHub Actions, and GitLab CI, streamlining Java Spring Boot application deployments and reducing manual interventions by 60%.
- Developed scalable **Java 8/11/17** and **Spring Boot** microservices following RESTful architecture, improving application performance and maintainability.

- Proficient in Full-Stack Development: Built and optimized Java Spring Boot micro services, integrated with React.js/Angular, and implemented RESTful APIs to enhance frontend-backend interactions.
- Enhanced Application Security & Compliance: Implemented JWT, OAuth2, SSL/TLS encryption, and RBAC, ensuring secure authentication and achieving compliance with ISO 27001 standards.
- Optimized Messaging & Event-Driven Systems: Integrated Apache Kafka and RabbitMQ for efficient async processing and real-time event-driven architecture.
- Advanced Monitoring & Alerting: Deployed Prometheus, Grafana, and Splunk for proactive monitoring, improving incident detection and resolution by 40%. Integrated Nagios, New Relic, and Datadog for comprehensive.

**Technologies/ Tools Used:** Java 8+, Spring boot, Rest Api, Microservices, Kafka, Spring MVC, Spring JPA, Spring Batch, Spring Security, IntelliJ IDE, Jenkins, Bitbucket, JIRA, Junit, Mockito, JMeter, Maven, Kubernetes, Splunk, Grafana, Dynatrace

#### Senior Systems Engineer

Nov 2021 – Aug 2022

**Company:** Infosys Pvt LTD, Hyderabad

**Client:** T-Mobile, Hybrid

**Description of the project:** The project involved developing backend services for T-Mobile's Order Management and Device Activation platform, which supported customer onboarding and mobile service activation. It managed the complete order lifecycle, including new connections, device upgrades, SIM activations, and number portability.

- Cloud Service Integration: Developed and integrated AWS Lambda, Azure Functions, and Google Cloud Pub/Sub within a unified Java Spring Boot architecture, enabling scalable event-driven processing and reducing infrastructure costs by 25%.
- Developed and secured scalable microservices using Spring Boot, implementing RESTful APIs (B2B) with Spring REST, improving system integration efficiency by 40%.
- Built interactive web applications (C2B) using Spring Web MVC, enhancing user experience by 35%.
- Designed and deployed microservices architecture on Spring Cloud, utilizing Eureka for service discovery and API Gateway for centralized routing, improving scalability and fault tolerance by 60%.
- Led cross-functional teams in project management and Agile methodologies, ensuring on-time delivery of critical financial applications.

**Technologies/ Tools Used:** Spring, Spring boot, Microservice, Restful web services, Gradle, Git, Jenkins, Service Now, Oracle DB, JPA, Hibernate

#### Assistant System Engineer

Nov 2018 – Oct 2021

**Tata Consultancy Services, Hyderabad**

**Client:** American International Group (AIG), Onsite

**Description of the project:** It is a web application which is a repository of all different databases connected together and user can perform CRUD operations. It is mini service now like application where user request to get access for tables to perform different operations. Admin can give access to tables to normal users and also privileges to all the reference tables.

- Gathered and defined customer requirements to develop clear specifications for project plans.
- Managed database operations using Hibernate and optimized queries for performance.
- Implemented CI/CD pipelines with Jenkins, automating build and deployment processes.
- Wrote unit and integration tests using JUnit and Mockito to ensure application stability.
- Implemented spring framework for Dependency Injection, support for the Data Access Object (DAO) pattern and integration with Hibernate.
- Used Microservices architecture with Spring Boot, Apache Kafka message broker, deployed to AWS.

**Technologies/ Tools Used:** Spring, Spring boot, Microservice, Eclipse IDE, Restful web services, Gradle, Git, Jenkins, Service Now, Oracle DB, Splunk

#### EDUCATION:

**Masters in Information Systems**

Aug 2022 – Aug 2023

University of Utah, USA

**Information Technology**

Aug 2014 – April 2018

GITAM University, Vishakhapatnam

#### CERTIFICATIONS:

**Certifications:** Microsoft Power BI Data Analyst – PL 300 , DP 203
